📍 52E Bemmulla rd,
Udugampola

SKILLS

- Programming Languages
  - Java
  - Java Script
- Frontend Technologies
  - Angular JS
  - React JS
- Backend Technologies
  - Spring Boot
- Database
  - MySQL

IDES / TOOLS

- InteliJ
- VS Code
- Postman
- Figma
- Git

PROFILE

I am Kaveen Senadeera, a dedicated and skilled Training Software Engineer with expertise in Java, JavaScript, and frameworks such as React, Angular, and Spring Boot. My passion lies in creating innovative and efficient solutions that drive technological advancements. Proficient in MySQL, I bring a strong foundation in database management to complement my development skills. With a commitment to continuous learning, I strive to stay at the forefront of emerging technologies, ensuring that I can contribute effectively to dynamic and challenging projects. My goal is to leverage my technical skills and knowledge to make impactful contributions in the field of software engineering.

WORK EXPERIENCE

- **Industry Training at Information ans Computer Engineering Technology**

  2024 - FEB - PRESENT

PROJECTS

- **Library Management System**

  - Angular , JDK 17
  - Spring boot farmwork
  - Microservice Architecture
  - Database - MySQL

  Responsibilities

  - Designed and implemented a microservices architecture, showcasing the ability to break down a monolithic application into scalable, independent services.
  - Demonstrated proficiency in Angular by employing advanced data binding techniques, ensuring dynamic and responsive user interfaces.
  - Implemented API fetching in Angular to seamlessly communicate with microservices, enhancing the overall performance and user experience.
  - Successfully developed two independent backends as microservices, emphasizing versatility in creating modular and distributed systems.

EDUCATION

2017 - 2023
ANANDA COLLEGE COLOMBO 10

2023 - present
INSTITUTE OF COMPUTER ENGINEERING TECHNOLOGY

- Higher Diploma in Software Engineering

2023 - present
INATIONAL INSTITUTE OF BUSINESS MANAGEMENT (NIBM - SRI LANKA)

- Foundation Course in Software Engineering

- **Weather Search App**

  - React Js

  Responsibilities
  - Implemented a dynamic Weather Search App using React.
  - Leveraged React states for seamless user interaction.
  - Utilized API fetching to provide real-time weather data.
  - Demonstrated proficiency in modular and component-based design.
  - Highlights expertise in React, states management, and asynchronous operations.

- **E Commerce site**

  - HTML5
  - CSS3
  - JS
  - PHP

  Responsibilities
  - Engineered an interactive e-commerce website using plain HTML, CSS, and JavaScript.
  - Employed PHP for database functionality, enabling seamless user interactions such as adding items to the cart.
  - Prioritized a responsive design for desktop users, ensuring an optimal shopping experience.
  - Successfully implemented cart functionality, allowing users to intuitively manage their selections.
  - Demonstrated proficiency in creating dynamic and engaging web applications with a focus on user interactivity.
